

Understanding Truck Drivers

URNS AND TRAFFIC CIRCLES

Trucks need more space than cars
to turn and on curves.

Keep in mind

Trucks may enter on another lane on a narrow road or in a traffic circle in order to turn. Do not try to squeeze by them to pass since they could block you in or unintentionally hit you.

Never enter an oncoming lane of traffic on a blind curve.

A truck could appear in front of you and not have enough reaction time to avoid a collision.
